VERTICAL SOFTWARE INC.

GrainTrac
The Standard of Excellence in Grain Accounting Software

Grain Accounting Software you can **TRUST**

GrainTrac by Vertical Software is designed to make grain accounting simpler, more accurate, and more efficient. This comprehensive software solution helps agribusinesses streamline their grain management processes while reducing errors, so you can focus on what really matters – your business.

- **Real People, Real Support:** Reach our dedicated support team any time with a call – no automated lines, just real people ready to help.

- **Inventory Tracking:** Keep accurate, up-to-date records of your grain inventory, with seamless updates to ensure precise stock management.

- **Comprehensive Contract Management:** Track both purchase and sales contracts, enabling you to manage obligations, pricing, and deadlines with ease.

- **Delivery-to-Settlement Tracking:** Monitor the entire lifecycle of your grain from delivery through to final settlement, ensuring full visibility and accountability.

- **Daily Position Reports:** Stay informed with daily position reports that provide real-time insights into your grain status and financial standing.

- **Patronage Management:** Easily manage and track patronage allocations to simplify accounting for cooperatives and other organizations.

- **Grain Storage & Grain Bank Tracking:** Keep detailed records of grain storage and manage Grain Bank transactions with accuracy, helping you optimize your storage utilization and customer relationships.
